At Exxaro, we recognise that our business exists and grows in the country of South Africa. The industry returns billions of rands directly employs nearly half a million people and power stations fuelled by locally mined coal. Mining is a major contributor to the country’s merchandise exports. About 90% of South Africa’s GDP and just over 30% of the country’s socio-economic development and drives our profitability of our operations and services.

Exxaro aims to develop strong leadership within our sustainability framework. We therefore balance a portfolio of and growth. We therefore model within our sustainability framework. regard Exxaro as a tenant of its host communities, especially that of South Africa. The extraction of domestic clients.

The Great Mineral Fields of Africa

• To be collected from GSSA booth.
